

WEATHER FORCAST for this epoch:

The orbs will rise, there will be gleams, there will be skys, the orbs will rise, planetoids approach, never was the sky so full of gleams. Also rain in Nembox.

Far Cones Spotted

Far Away - By Mr Exwot Demder

© Very Long Looking Glass That Impresses Many

Axiomps voyage to the never dark spotted cones, are they tall?

Investigation afoot! It is known that cones are found in many ways, but how can you consider this to be uninformative. Soon it is known.

Given by special report, Captain Azwot "Exceptional sighting by young lad, the crew are no sooner than close. Merry days even if cones are not as they seem, for we know elevations to be fine". The hero has spoken.

Questioning the voyage is Dr Lemly "I wear the socks of question, is this now?" An opinion shared by others, overruled. Time tells and forgets, news is forever.

IT LOOMS!

Galaxy Local - By Dr Ozwot Wot

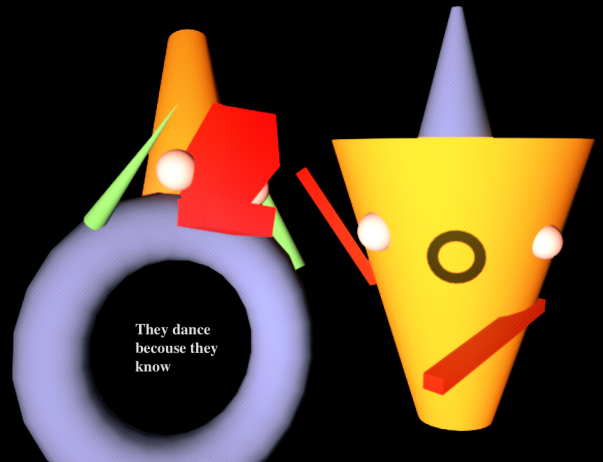

The orb looms! It has been looming for many epochs, some fear it looms more now than before. Before the orb, there was no looming, now it looms. Facts are clear, actions yet to be taken. The orb did not respond to questioning, this is not uncommon for orbs. A population in fear, for now considering.

Image of looming

Dr Maxot Tagon, Solver!

Knowings - By Miss Damta Tri

They dance
because they
know

When the disc, ever wide, faded to the gleams and the gleams faded with it, Oltoid Vamber asked "Where are you gleams". Dr Maxot Tagon, solver, did the deed "Today we do the dance of knowing, and wear the hat". Now the question will gather no more, it has been found. The disc is written and jubilation acquired, but what of tomorrow? Todays knowing is another days unknowing, and soon after yet again, the hoop is known and unknown because it is this.

The ? House

With
Miss Olby
Wise

A letter from Lady Nantop Atalia, acquiring orbulons.

Q: Lady Atalia here, I require orbulons, please help.

A: Ah yes, the eternal search. Many hope in the finding, but are unfulfilled. Praise paste all time, but get only gobulons. Consider creativity, is orbulon required when squarulon will do? Visit the markets in outer Tansaya for good deals, beware of baggely vendors! Be patient for soon the orbulons will arrive.

A letter from Miss Mem Trop, cosmic love.

Q: Miss Mem Trop here, Wayish Lemly visits for 7000 epochs, but still only friends?

A: Ah yes, the sad situation. Perhaps recall, we are non corporeal cosmic entities and do not experience love, this may be the root of your issue. Try hints, orb lit paste gathering, gift of Lamber Stacks. Wait 12,000,000 epochs, does Wayish Lemly evolve into new entity? Consider transcending.

A letter from Lord Yolto, sightings at the gate.

Q: Lord Yolto here, I saw Ozwomp arrive at the gate.

A: Ah yes, many arrive at the gate, this is normal.

WHAT
DOES THE
BOX SAY?

"GREE
TINGS"

AND NOW
YOU
KNOW...

Mr Gorbi's Seeing Review

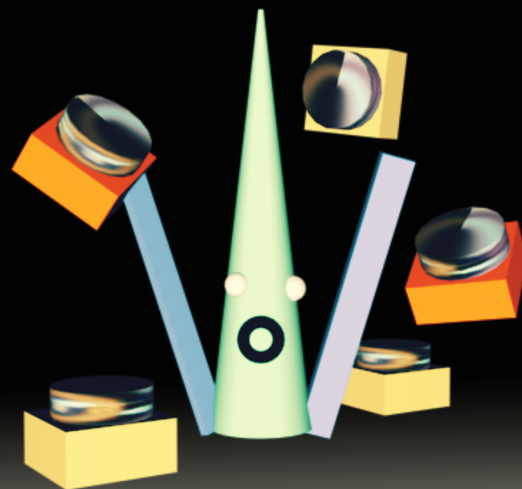

Mr Gorbis here, 473 epoch is the review of Old Ms Magbag and the Plattyhoop.

The tale is fine, for Ms Magbag is old and the plattyhoop was lost in the fog. Oh how the lookers reacted, director did the deed, it is so. Yet the critic had questions, why blue when red was to be expected, artful analogy? By no means. Still observe.

458.2/58 ever gleams!
